**Subject:** Public Comment: increased Hate Crime towards Asian.

There is increased hate crime towards the Asian community. Please educate government workers and police stations to better protect Asian residents and eliminate racist. You should say something on Twitter supporting Asian community. The city website should have Chinese version and your files should also publish in Chinese version and also provide forms for application in Chinese. And allow people who speak mandarin speak in the meeting and have translators supporting them. And they get the same length of speaking time. Publish crime and incident records with statistics on Asian community. Our leaders in the government need to speak to problems with Asian-targeted hate crime and inform the Asian community of what they plan to do to fix it.
