**Subject:** Public Comment: increased Hate Crime towards Asian.

There is increased hate crime towards the Asian community. Please educate government workers and police stations to better protect Asian residents and eliminate racist. You should say something on Twitter supporting Asian community. The city website should have Chinese version and your files should also publish in Chinese version and also provide forms for application in Chinese. And allow people who speak mandarin speak in the meeting and have translators supporting them. And they get the same length of speaking time. Publish crime and incident records with statistics on Asian community. Our leaders in the government need to speak to problems with Asian-targeted hate crime and inform the Asian community of what they plan to do to fix it.

**Subject:** March 23 2021 Council Item 6A - Recology - Comments for posting on line

City Clerk Thurman

Please post my following commnets on agenda item 6A - Recology

1. Thank you Recology for offering to delay your authorized rate increase
2. Thank you Recology for thinking outside the box and proposing to run a 2 month pilot project to see if the costs associated with making roaming pickup of disposed on the street items can be accomplished without the need to rise rates to cover it.
3. I hope if the residents learn that Recology will be attempting to pick up such stuff, they do not increase what ends up on the street
