San Bruno City Council Members,

If the El Crystal school property is put up for sale, I hope you seriously entertain having the city purchase the property for future public use.

This much land near City Park could be used for many purposes that could be determined later. My elementary school in San Mateo was sold and homes were built and now the community doesn't have the use of the recreation area or the buildings or the land the buildings were on. It was very short-sighted as the property is worth many times what it was sold for and large vacant property is non-existent.

If the city does not have the funds, I hope the San Bruno Foundation could help finance the purchase. When I filled out the San Bruno Foundation survey, I mentioned a good use of the potentially \$30 million left would be to use some of the funds for the El Crystal property purchase.

I will not be attending the Monday, May 3, 2021 meeting but hope you have a chance to read this before the meeting.

Thank you.
