Subject: The Stormwater Election Held in San Bruno in 2021

Does anyone know what they are doing in San Bruno government?

1. When I first heard about the storm water problem it was the police chief recommending a "Yes" vote along with the fire chief.

My first thought was why are they commenting on a non-law related problem.

2. Why are we hearing about this and why has this not been discussed in the past. After all, we have a democratic president and governor who are throwing money away on every other useless project. Why not the project in SAN BRUNO?

3. Who was the useless person who decided to try and fool the home owners with this election. I guess you think we are not looking and are stupid.

4. The proposition was a stupid one: to run a project with unlimited raises to our property taxes every year is ludicrous.

You guys must think the homeowners don't read the proposals that government elected officials place on the ballot. Well think again.

My family has not endured the pandemic very well, with a death in my family and unemployment. To see an attempt by my city government to increase my property taxes is absolutely asinine.

I hope I can vote for someone who cares about its citizens. It is not you!!!

A concerned homeowner,

Ed Barsetti.
